EASTERN CAPE FORMULARY

*Essential drugs are those that satisfy the needs of the majority of the population.
The appropriate drugs for each level of care should therefore be available at all times,
in adequate amounts, and in the appropriate dosage forms.*

FOREWORD

This second edition of the Eastern Cape Province Formulary is the result of dedication by the members of the Eastern Cape Provincial Pharmacy and Therapeutics Committee (PTC). It is encouraging that it is completed 2 years after the first publication giving direction towards the goals of the National Drug Policy of ensuring that quality essential drugs are available and accessible at an affordable price. This Formulary should at all times be used together with the **Standard Treatment Guidelines and Essential Drugs List** as published by National Department of Health in 1998.

The Eastern Cape Formulary provides a *list of items that can be used* by health care providers at different levels. It should also be used as a reference for ordering and/or inventory management.

ACKNOWLEDGEMENTS

The Eastern Cape Provincial PTC is to be commended and sincere words of gratitude extended to them for the sterling work that they have done.

The role of the EQUITY Project in support of the PTC and in supporting the production of this document is gratefully acknowledged.

THE PROVINCIAL PHARMACY AND THERAPEUTICS COMMITTEE

The Eastern Cape Department of Health is committed to ensuring that drugs that have been deemed to be essential and life saving are available and accessible to treat the major health conditions of the majority of the population. This is in line with the National Drug Policy and the Essential Drugs Concept. What is included in this publication is a list of drugs that have been deemed to be safe, effective and of good quality. The prescribers, dispensers and consumers should use them in a rational manner by promoting adequate and appropriate information, education and communication strategies.

As new drugs become available through research and development, they will be critically evaluated, utilizing evidence-based information for relevance. Future additions, deletions, amendments are therefore encouraged, supported by scientific data and appropriate references. This is a living document that is open to critical review.

It is now up to health workers to ensure that management of drug supplies ensures access and availability of essential drugs at all times when they are needed at the relevant level of care.

The National Drug Policy advocates the establishment of Pharmacy (or Drugs) and Therapeutics Committees (**PTC/DTC**) at all levels. The main objective of a PTC is to ensure the rational, efficient and cost-effective supply and use of drugs.

The brief of the provincial PTC is inter alia:

1. To review and tailor the national EDL to the prevalent health problems
2. To promote cost effectiveness principles in drug selection
3. To establish appropriate prescribing levels
4. To review drug expenditures and trends at the provincial level
5. To serve as a link between the national EDL committee and the provincial service providers to provide feedback and exchange information.

CONCEPTS INTRODUCED IN THE EASTERN CAPE FORMULARY

CODE NUMBERS

The Province of the Eastern Cape will be standardizing product code numbers by phasing out the 7-digit ICN currently in use in Port Elizabeth. The national stock number (NSN) will be used throughout the province as in the rest of the country. In addition, a new structured coding system has been developed where a unique code/identifier has been assigned to each product pack size. The alphabetical product list includes the NSN and the new code. The new structured code will be phased in at the depots, and either of the codes may be used when ordering supplies from the depots.

PRESCRIBER LEVELS

As summarised in Table 1, each drug listed on the Eastern Cape Formulary has been assigned a prescriber level. In the same manner, **each prescriber should be assigned a level appropriate to his/her area of operation and expertise.**

Table 1- PRESCRIBER LEVELS

PRIMARY HEALTH CARE LEVELS

- | | |
|-----|--|
| 1A | Registered nurse |
| 1B1 | Clinical nurse practitioner |
| 1B2 | Specialist nurse (e.g. Psychiatric nurse, Midwife, IMCI-trained nurse) |
| 1C | Doctor at PHC level (including all practitioners up to the level of district hospital OPD) |
| 1! | Emergency Limited quantities, at all levels |

SECONDARY AND TERTIARY LEVELS

- | | |
|---|--|
| 2 | General Practitioner at hospital level |
| 3 | Specialist |
| 4 | Specialist Designated |
| 5 | Motivation for individual patient only - Named Patients |
| T | IV Fluids (not allocated yet) and TPN Solutions (Treat as level 5 items) |

Level 1 drugs should be available to all prescribers who are providing primary health care services through health clinics, health centres and district hospital out patient departments (**OPD**). Level 1 is split into 5 sub-levels.

Level 2 drugs are meant for initiation by doctors practicing at hospital level (secondary or tertiary).

Levels 3, 4 and 5 drugs (Specialist items) can only be prescribed by medical specialists: the latter only on a named-patient basis.

Drugs prescribed to patients who are down-referred for continuation therapy to a lower level of care can be obtained after authorization through the relevant PTC. Such authorisation automatically expires after 6 months.

THE LISTS

Products are listed using two different formats

Sorted by *Anatomical Therapeutic Chemical (ATC) Classification* and

Sorted by *Product Name*.

Lists Sorted by ATC Class

In these lists pharmaceutical products are listed according to the “Anatomical, Therapeutic, Chemical” Classification (**ATC**). This is the classification also used in the EDP Standard Treatment Guidelines and the South African Medicines Formulary (SAMF).

3 ATC lists are included:

1. Primary Health Care list (includes all level 1A, 1B1, 1B2, 1C and 1! Drugs)
2. Hospital List (includes all level 1 and 2 drugs)
3. Specialist List, including Named-patient drugs (consists of levels 3, 4 and 5 drugs).

This list provides reference to the indications for which the level 5 drugs are allowed, while indicating the recommended medical speciality to which the level 4 drugs are restricted. Users' feedback regarding this new feature of our Formulary would be greatly appreciated.

Each product description contains the following information:

- **Generic name** (i.e. Paracetamol): In accordance with the National Drugs Policy only generic names or International Non-proprietary Names (INN) are used. Prescribers must also use this name (*In a few cases, like contraceptive tablets and large volume parenterals, the brand name is shown in brackets for easy reference*).
- **Strength** (i.e. 500mg): The concentration of active ingredient(s) - in our example each tablet contains 500mg of paracetamol;
- **Dosage Form** (i.e. tablet): The pharmaceutical form of the product.
Additional information:
- **Prescriber Level** (i.e. 1A): The availability of drugs at various facilities is determined by the type of prescriber attached to the health facility (and not by the type of facility).
- **ATC Code** (i.e. N02AA): The product ATC class. The ATC is developed and maintained by the World Health Organization Collaborating Centre on Drug Statistics and Methodology.

List Sorted by Generic Name, Form and Strength

In this comprehensive list encompassing all levels, pharmaceutical products are listed by generic name, form and strength in alphabetical order. It contains all the information described previously and also the following:

- **Product Code** (i.e. T1525044): A structured Eastern Cape product code number. Each pack size has been assigned a unique code.

- **NSN Number** (i.e. 189753434): The National Stock Number (**NSN**) used by the National office and by the depots to manage their inventories. This number must be used when ordering stock.
- **Pack Size** (i.e. 100 Tablet): The alphabetical list shows all the pack sizes available with their code numbers.
- **Price** (i.e. R 5.53): The contract price at the time of the publication. This price is given for information only as contract prices change on a regular basis. Current prices are listed on depot catalogues.
- **Price per comparison unit** (i.e. R 0.06/Tablet). Using a common unit (tablet in this example), one can compare the various pack size prices.

Supplementary Lists

List of TPN Solutions available, as well as IV fluids not listed in the EDL

Recommended list of Galenicals

Guideline list of Disinfectants and a few supplementary items

ITEMS NOT LISTED

Some items (e.g. mineral solutions) are not yet routinely available on contracts. These may need to be extemporaneously prepared or on special order only. If no contract exists for an item, it has been left out of the alphabetical list. Please direct enquiries in this regard to the depots or the provincial office.

DISTRICT AND INSTITUTIONAL THERAPEUTIC COMMITTEES

District and institutional therapeutics committees are expected to confine their selection to drugs listed on the Eastern Cape Formulary and create their own formulary from this list according to the prevalent health problems in their area and the level of care provided. All submissions to the provincial PTC or national EDL, as well as submissions for access to non-Formulary items should be dealt with at the level of the local PTC first.

SUBMISSIONS FOR CHANGES TO THE EASTERN CAPE FORMULARY

Requests for new items must be made via local therapeutics committees. The provincial PTC will preferentially entertain requests channelled through local PTCs or recognized bodies. Submissions for inclusion or exclusion must be done using the form included in the Annexure (guidelines are provided). All relevant information must be included, and should be sent to the Head of Health, for attention of the Director of Pharmaceutical Services, for consideration by the Provincial Therapeutics Committee.

The National EDL committee will only consider provincial motivations received through provincial PTCs, therefore contributions to the National EDL can be made only through this channel.

MOTIVATIONS FOR ACCESS TO LEVEL 5 OR NON-FORMULARY DRUGS

The procedure to access drugs classified as named-patient drugs, or drugs not appearing in the formulary, is included along with the relevant motivation form.

REPORTING AND COMPLAINTS

All local PTCs must report quarterly on all level 5 and non-formulary approvals in the prescribed format. In addition an annual report for each institutional PTC must be submitted to the provincial office by no later than 31 May each year.

Drug shortages and quality complaints should be reported to the provincial office in the provided format.

DRUG SUPPLY MANAGEMENT

The health officers responsible for placing orders and controlling stock levels are urged to manage their drug supplies carefully to ensure the availability of essential drugs and to reduce waste through expiry, overstocking or poor storage. All orders should be completed correctly, signed and must comply with the prescribed ordering schedule. Stock records must be maintained and checked regularly.

Galenical List

This list is the first draft of the Eastern Cape galenical formulary, containing products used in extemporaneous and batch preparations. The details on available pack sizes and code numbers should be used as a reference when ordering. All orders should be placed through the pharmaceutical depots, unless otherwise approved by the Provincial office. Where new or additional items are required, potential sources should be identified if possible.

- **MEDICINE COMPLAINT FORM / REPORT OF ADVERSE DRUG REACTION (MCC)**

ACCESS TO LEVEL 5 AND NON-FORMULARY ITEMS

All Requests for Level 5 or Non-Formulary Items

- Access to level 5 and non-formulary items can only be obtained at facilities where there is an active Pharmacy and Therapeutics committee.
- Where the patient's clinician has identified a rational requirement for a non-formulary medicine, a motivation must be completed on the relevant form (PTC_NP1).
- All relevant information relating to the patient, prescriber and clinical details must be provided.
- If the motivation is in response to a referral from a tertiary hospital, contact detail of the expert and the full report must be included.
- Patients who have not been managed within the public health sector for at least 3 months prior to the request, will only be considered for non-EDL treatment under exceptional circumstances.
- Only motivations by clinicians within the public health sector will be considered.
- Motivations will be considered by the local hospital or district Pharmacy and Therapeutics Committee (PTC).
- Decisions made by the local PTC should be communicated to the pharmacy in the form of a letter of authorisation signed by the chairperson of the local PTC.
- Authorisations should be for a course of therapy as submitted, up to a maximum period of 6 months, after which date the motivation should be re-submitted.
- Each local PTC should maintain a register of all authorisations. The Provincial PTC must be notified every 3 months of all authorisations approved.
- A requisition, quoting the authorisation number, must be placed with the pharmaceutical depot. Quantities ordered may not exceed those authorised, nor may orders be placed beyond the expiry date of the authorisation.
- Pharmaceutical depots may only order non-formulary items or level 5 items with the relevant authorisation number.

In addition to the general procedures, the following procedures apply, depending on the nature of the motivation:

Named Patient Requests (Level 5)

- Motivations for these restricted items may only be submitted by senior consultants for the indications approved by the provincial PTC.
- Where a junior consultant requires use of a drug at this level, the relevant clinical department head should approve the motivation with a covering letter.
- Where appropriate, funding of these medicines should be through the relevant grant, e.g. National Tertiary Services Grant (NTSG).

Adverse Drug Reactions / Allergies

If an item is motivated for on the grounds of an adverse drug reaction or allergy to the formulary drug, the relevant Medicines Control Council (MCC) report (and their response if available) should be attached to the submission.

Non-Contracted Items

- If a local PTC authorises the use of a drug not currently appearing on any of the national contracts, the authorisation should be submitted to the Directorate of Pharmaceutical services, along with full details of the supplier and quoted cost.
- The directorate will supply the relevant pharmacy and the depot with an authorisation number to purchase per quote.

Indications not Covered in the EDL, including Unique Services

- The local PTC should ensure and endorse that the indication quoted is not covered by guidelines in the national EDL.
- If the condition / severity / cost of the medication would justify its consideration for funding from the unique services grant, a submission in this regard (approved by the chairperson of the local PTC) should be made to the Director of Pharmaceutical Services at the provincial office in accordance with the Standard Operating Procedure for Access to Unique Services Grant.
- Motivations for non-SA registered medicines should be accompanied by the relevant MCC authorisation number.

Failed Therapy

- Drug history is vital in the submitted report.
- The drug history should be matched with the outcome measures.

Consideration for non-formulary Anti-microbials

- The local PTC, in consultation with the infections control committee, should identify those anti-microbials that are required in terms of their institutional resistance management protocol.
- An “initiation stock” for non-formulary items may be ordered once off with an authorisation supplied by the local PTC chairperson. It is recommended that a maximum supply of 7 days treatment for 3 patients be kept.
- Replenishment of this initiation stock must adhere to all the requirements for non-formulary items in the same manner as per failed therapy.
- The chairperson of the PTC or his/her designate (possibly per roster) must authorise the initiation of any non-formulary anti-microbial preparation.
- Non-formulary anti-microbials may not be initiated empirically. Microscopy and Culture results should be provided.
- The infection control committee should be fully informed.
- The use of non-formulary anti-microbials is limited to facilities with an ICU
- All anti-microbial authorisations should be recorded in the PTC register and should be reported at every meeting of the local PTC.

GUIDELINES ON COMPLETION OF THE SUBMISSION FOR INCLUSION / REMOVAL FROM THE EASTERN CAPE FORMULARY / NATIONAL EDL

The submission form ought to be considered a communication tool between the motivator and the evaluating committee.

Motivation Header

This section provides the basic features of the motivation

1. Proposed drug - only the generic drug, in its INN form, will be considered here.
2. The question about level of care and prescriber level will reflect where you feel a drug ought to be placed in the management continuum. This has an important bearing as to how the drug's potential cost impact is reviewed.
3. Motivators details are vital so as to facilitate communication between the committee and the motivator.

Proposed indications

This section has 3 basic features.

1. Indication
Most drugs have numerous indications however it is seldom that all represent equal benefits over current therapeutic options. The indications listed here serve to identify the comparison drug as well as highlighting which of the potential indications you feel merit consideration.
2. Standard regimen
The aforementioned range of indications may require different dosing techniques that are reflected in this these columns of the table. Furthermore these columns inform the cost of therapy values.
3. Cost assessment
The local pharmacy department can supply the current tender prices which are then used to calculate the cost per day and cost per month for chronic medication or cost per course. Where no tender exist the private sector prices may offer a guide.

Level of evidence

For each indication the level of evidence is designated according to the following scheme:

- Ia Meta-analysis or Systematic review
- Ib Randomised Controlled Trial
- II Controlled study with no randomisation
- III Comparative, correlation or case control study
- IV Expert committee
- V Clinical experience

It is important to note that the level of evidence only informs the strength of the argument and does not make the final decision. It is therefore possible that a drug with supporting evidence of Ib maybe considered more favourable over a drug which is supported by 1a.

The evidence used to support these arguments ought to be referenced overleaf so as to facilitate review.

Where possible, copies of the evidence ought to accompany the submission. Note - a more comprehensively referenced submission accompanied by copies are more likely to be reviewed more quickly.

Replacement Drugs

This table allows you to reflect upon the current therapeutic options available to you and places the proposed drug in its appropriate context.

1. Drug - refers to the comparator drug. In the ideal situation the evidence reference list ought to include randomised controlled trials that compare the proposed drug with the current drugs on the EDL or formulary in regimens that would be considered as the standard of care.
2. The indication, regimen and duration all inform the efficacy and cost comparison.
3. The last 3 columns reflect whether you see the proposed drug as an alternative or replacement. Where evidence can substantiate it replacements are considered more favourable.

ADVICE ABOUT VOLUNTARY REPORTING

Report adverse experiences with:

- medications (drugs, vaccines and biologicals)
- medical devices (including in-vitro diagnostics)
- traditional and herbal remedies
- For Adverse Events Following Immunisation (AEFI), please follow the reporting procedure recommended by the Expanded Programme in Immunisation (EPI)

Please report:

- adverse drug reactions to recently marketed products
- serious reactions and interactions with all products
- adverse drug reactions which are not clearly reflected in the package insert.

Report even if:

- you're not certain the product caused the event
- you don't have all the details

Report Product Quality Problems such as:

- suspected contamination
- questionable stability
- defective components
- poor packaging or labelling
- therapeutic failures

- 4 Carboplatin 150mg Vial * Oncology *
- 4 Carboplatin 450mg Vial * Oncology *
- 4 Cisplatin 10mg Vial * Oncology *
- 4 Cisplatin 50mg Vial * Oncology *

L01XB Methylhydrazines

- 4 Procarbazine 50mg Capsule * Oncology *

L01XX Other antineoplastic agents

- 4 Asparaginase 10 000KU Vial * Oncology *
- 4 Hydroxyurea 500mg Tablet * Oncology *

L02 ENDOCRINE THERAPY

L02BA Anti-estrogens

- 4 Tamoxifen Citrate 10mg Tablet * Oncology *
- 4 Tamoxifen Citrate 20mg Tablet * Oncology *

L02BG Enzyme inhibitors

- 4 Aminoglutethimide 250mg Tablet * Oncology *

L03 IMMUNOSTIMULANTS

L03AA Colony stimulating factors

- 5 Filgrastim 300mcg Vial * Oncology Supportive *
- 5 Filgrastim 300mcg Syringe, Prefilled * Oncology Supportive *
- 5 Filgrastim 480mcg Syringe, Prefilled * Oncology Supportive *

L03AB Interferons

- 5 Interferon Alfa-2b 3MU Ampoule * Hepatitis, Chemotaxic Therapy support *

L04 IMMUNOSUPPRESSIVE AGENTS

L04AA Selective immunosuppressive agents

- 4 Ciclosporin 100mg/ml Solution, Internal * Renal Unit *
- 4 Ciclosporin 25mg Tablet * Renal Unit *
- 4 Ciclosporin 100mg Tablet * Renal Unit *
- 5 Tacrolimus 1mg Tablet * Ciclosporin failure in renal transplant *
- 5 Tacrolimus 5mg Tablet * Ciclosporin failure in renal transplant *

L04AX Other immunosuppressive agents

- 3 Azathioprine 50mg Tablet

MUSCULO-SKELETAL SYSTEM
